## Summary

A 8+ years experience technology professional who is equally capable of working with business and engineering stakeholders to deliver desired results. Ready to challenge status-quo and drive innovative ideas as and when needed. As being mostly an entrepreneur, understands what failure truly means, and believes firmly that life is all about averages, one should evolve through experiences.

Actively looking out for opportunities related to Project/Program management in technology and software engineering domain.

## Skills

- Agile Project/Program/Product Management
- Design Thinking
- Cross-Functional Communication
- Emergent Leadership
- Cloud Computing using AWS & GC
- Scalable Solution Architectures
- Lean Startup Engineering
- Software Engineering Management

## Experience
